

ITC STUDENT HELPER TRAINING & DUTIES GUIDE

IT Service Counter and Classroom Maintenance Operations Manual

1. Core Values, Team Roles & Professional Conduct

Academics always come first, but while on duty, ITC student helpers are expected to exhibit the highest standards of **honesty, self-discipline, responsibility, effective time management, and mutual respect**. Please manage your personal schedules and academic workloads so that you can fully enjoy your university life.

MANDATORY DRESS CODE & IDENTIFICATION

Student helpers **must wear the helper badge on duty** at all times. This establishes a professional image, identifies you to staff and students, and allows security guards to identify you when requesting room access after-hours.

Key Team Roles and Contacts

Role / Title	Name	Key Scope & Responsibilities
ITC Full-Time In-Charge	Paul	Program manager, coordinates ad-hoc events, overrides work limits, handles payroll approvals.
Team Managers	Felix Hoy / Daniel L.	Supervise overall classroom maintenance operations and IT helper coordination.
Senior Student Helper (Records)	Jason	Manages overall work schedule, attendance, and duty check-in/out records.
Senior Student Helper (Audits)	Anson	Audits and cross-checks the correctness of submitted reports via random spot-checks.
ITC Service Counter Staff	Counter Team	Full-time IT staff sitting next to you. Direct contact for routine escalations and pay inquiries.

Communication Rule: The official **WhatsApp group** is the primary channel for routine announcements, emergency reporting, and leave coordination. For salary, hour disputes, or shift swaps, consult other IT staff sitting next to you at the service counter, or contact Jason directly. Do **not** contact high-level IT directors or managers listed on the departmental chart.

2. Category A: Service Counter Duty

Counter duty is a fast-paced, high-engagement role. It is designed to help you rapidly develop your communication, problem-solving, and emergency-handling skills.

Service Hours & Location

Term Time Hours: Monday to Friday, 8:30 AM to 6:30 PM.

Term Break/Holiday Hours: Monday to Friday, 9:00 AM to 5:30 PM.

Note: Closed on Saturdays, Sundays, and public holidays. Helpers sit behind the ITC counter next to full-time staff.

Key Counter Workflows & Operational Standards

- **Professional Inquiries:** Listen attentively, maintain an appropriate speaking speed and polite tone. Introduce yourself professionally (e.g., 'Good morning, ITC, my name is [Name], how may I help you?'). Learn to synthesize complex, long user descriptions into concise, clear, and actionable summaries.
- **The Golden Rule: Never guess or provide unverified/fake information to a user.** If you do not know the answer, calmly write down the user's Name, Student/Staff ID, location, and contact number. Pass the details to the full-time staff member sitting right next to you to handle the escalation.
- **VPN & 2FA Knowledge Base (KB):** 80% to 90% of basic user inquiries concern LUVPN and Duo Two-Factor Authentication (2FA). Refer to the system's pre-defined KB links to walk users through Duo 2FA reactivation (such as for lost or new phones) or LUVPN configuration in mainland China and overseas.
- **IT Equipment Loan Protocol:** Only current staff and active students are eligible to borrow equipment (**Alumni are strictly not eligible**). Scan the equipment's QR code or enter the label number in the database, and click 'Save Booking' to log transactions.
- **Accessories Check:** Always inspect every accessory before checking an item out. For example, a presentation pointer must include both the pointer itself and its tiny USB wireless receiver. If the receiver is missing, the item is useless and must be flagged.
- **Out-of-Hours Voicemails:** Retrieve voicemail recordings left outside operating hours and log them as standard incident tickets in the system.
- **Shift Handover:** Keep the counter clean and professional. Ensure no personal documents or sensitive information are left exposed. Fill out the brief 'Counter Check' form confirming printer keys and backup badges are returned safely to the cabinet before signing out.

MANDATORY IT EQUIPMENT TESTING RULE

For all electronic loan equipment (such as laptops, projectors, or TV monitors), **you must power on and verify functionality in front of the borrower before they walk away with it.** This prevents borrowers from returning damaged items later and claiming that the equipment was 'already broken when borrowed'.

3. Category B: Maintenance & Classroom Checks

These preventive checks are scheduled around class hours to guarantee that university teaching runs smoothly and without technical interruptions.

A. Morning Classroom Check (8:30 AM – 10:30 AM)

The core objective is to detect and resolve any equipment issues **before classes begin**. Walk through designated classrooms and verify the following checkpoints:

- **Teacher Podium & PC:** Turn on the teacher's PC and monitor. Ensure the keyboard and mouse are responsive. If the podium has dual screens, ensure they are in **'Extend' mode** (press *Win + P*). If one screen is black, it is usually because the previous user set it to 'PC only' or 'Second screen only'.
- **Speaker Test (The 10-Second Rule):** Play a brief YouTube video (e.g., the President Joe Chen welcoming address) to verify audio output and speaker volume. If there is no sound, check connections or the Extron panel.
- **Microphones:** In general classrooms, retrieve the wireless or lapel microphone from the teacher's cabinet. Perform a quick voice check (say 'hello' to test). Replacement batteries, headset covers, and backup mics are stored in the LCS 206A cabinet. **For special lecture theatres (LBY, MBG22, MBG6, LBY GC1), do not use wireless backups; test using the digital microphone mounted directly on the podium.**
- **Webcams:** Open the camera application on the PC. Test both webcams (one facing the teacher, one facing students). Inspect the physical mount—report immediately if tripods are loose or fixed temporarily with tape.
- **Instruction Manuals:** Verify that the **three mandatory manuals** are physically present on the podium: System Login Manual, Panel Guide, and Hotline Menu. Note any missing guides.
- **Work Evidence (Mandatory):** To prevent fraudulent reports, morning checks require photo evidence. You must upload a photo taken from the teacher's angle showing the working dual-screen PC, and take a selfie using the webcam via the Microsoft Form. If a fault is found, post a photo to the WhatsApp group immediately.

B. Computer Lab Check (Evening / Post-Class Session, 2 Hours)

Perform checks on 9 to 20 PCs depending on the designated lab location (e.g., check the entire room in L206A; check only 8-9 specified PCs in LKK 3/F as outlined in your shift description). Checkpoints include:

- **System Login & Peripherals:** Turn on PCs and monitors, login with your student account, and test keyboard/mouse responsiveness.
- **Asset Labels:** Verify that yellow ITC asset labels (e.g., SDK GCU, LBY F1) are present on both the monitor and PC chassis.
- **Software & Audio:** Verify that specialized applications (SPSS, SDL) launch correctly. Test the PC's audio output and mic recording.
- **Printer Connectivity:** Perform a test print (e.g., print '1 2 3' from Notepad) to confirm the default printer outputs paper successfully.
- **Safety & Tidiness:** Arrange all chairs neatly. **Ensure power bars and cables under and behind the desks are organized and safely placed**, not messily tangled or exposed.

C. Printer & Paper Store Check (Scheduled Shifts, 1 to 2 Hours)

Covers 7 Octopus-operated printers across 4 campus locations: **MB202, LCH 213, SKG CO2, and LCH 206A**. Perform the following routine:

- **Refill Paper:** Retrieve the printer cabinet key from LCS 206A or MB402. Collect paper packs from the MB402 ITC Service Counter and refill A4/A3 drawers.
- **Toner Level Checks:** Access the printer screen menu. If any toner level is **under 20% or 30%**, take a photo of the status screen and report it via the form so service providers can replace it promptly.
- **Octopus Card Reader Jams:** If an Octopus card is stuck in the reader, **turn off the card reader's power, wait 1 minute, and turn it back on**. The reader will auto-diagnose and safely eject the card.
- **Paper Store Count (Mon & Fri Only):** **Only the first printer check session on Mondays and Fridays** requires counting and reporting the remaining paper stock in the MB402 paper store. This is not required on weekend shifts.
- **Handover Optimization:** If paper runs low but you cannot finish refilling during your shift, mark it in the submission form to flag it for the next student helper, creating a seamless team workflow.

D. Hostel Network Check (3-Hour Shift)

Exclusive to helpers residing in **Hall B, Hall H, or WJY hostel**. Perform network checks directly from your own room **twice per shift**. Connect to LU / LU1 Wi-Fi, run speed tests, ensure stable ping connection to Google, and submit the Hostel Check Microsoft Form twice per shift.

4. Administrative Systems & Salary Policies

To ensure precise work calculations and maintain professional self-discipline, helpers must adhere to the following technical workflows:

A. Duty Booking System ([helperduty](#))

- **URL & Network Access:** Accessible only on campus Wi-Fi, or via LUPPN when off-campus.
- **System Credentials:** Username is your student email; password is your Student ID (standalone database, not linked to main LU systems).
- **Strict Confidentiality Rule:** This is a private system. **Do not disclose its existence to other university departments** (e.g., OSA).
- **Reservation Limits:** Counter shifts can be booked for a minimum of 30 minutes. Other maintenance checks require reserving the **entire time slot**. The system enforces a maximum limit of **16 hours per week**. Overlapping bookings are strictly blocked.
- **Leave Application & Swaps:** Send a detailed leave message on WhatsApp (Name, date, time, duty, and reason). Find a substitute helper to cover (first-come, first-served). Then, **manually delete your booked slot in the helperduty system**.

B. Sign-In & Sign-Out System ([itc.ln.edu.hk/helper](#))

- **Location Enforcement:** You must be physically on campus and connected to the campus network to sign in or sign out. Hostel helpers must go to the nearest classroom block to perform sign-in/out.
- **Sign-Out Pre-requisite:** You cannot click 'Sign out' until you submit the duty's Microsoft Form and receive the CC'd copy in your student email. **Always use your own account to submit forms.**
- **Strict On-Time Sign-Out:** If you finish checks early (e.g., a 2-hour shift completed in 30 minutes), you can submit the form immediately, but **you must wait and sign out exactly on time**. IP addresses are not tracked, but late/early sign-out records are logged for helper performance statistics.

C. Monthly Salary Claim (CAMP Form)

Around the **6th to 8th of each month**, Paul will pre-fill your worked hours in the CAMP Form. Helpers must verify the hours and **manually fill out the yellow-highlighted fields** (Student ID, Bank Account, Signature, and Date) as strictly required by the Finance Office (FO). Submit the signed form via email, in-person, or WhatsApp. *Note: Only sessions with complete, valid sign-in and sign-out records are eligible for salary calculation.*

CORE PROFESSIONAL GOAL

As Paul highlighted, the student helper program is designed not just for earning money, but as an opportunity to **improve your communication, problem-solving, and career readiness**. Have self-discipline, respect your peers, and above all, enjoy your university life!
